Summary

A passionate and skilled Web Developer with hands-on experience. Adept at creating dynamic, responsive, and user-friendly websites. I'm committed to continuous learning and utilizing cutting-edge technologies to deliver optimized solutions for clients and users.

Skills

Markup/programming languages: Python, JavaScript, PHP

Frontend Technologies: ReactJs

Backend Technologies: Express.js, NextJs

Database: MongoDB, MySQL, PostgresQL

Experiences

Frontend Developer

[Theme Bucket Ltd](#) | 2023-Now

I ensured the seamless operation and continuous improvement of the company's web applications, keeping them functional and up to date. I built responsive, user-friendly interfaces using React, Redux Toolkit, and modern web technologies to enhance user experience. I also collaborated closely with the development team to implement and maintain front-end and back-end features, focusing on performance, scalability, and efficiency.

Projects

LifeLine – Smart Blood Donation Network

Connects donors and recipients with real-time emergency request features. Includes secure JWT auth and blood-type/location-based search.

Nexora – Modern E-Commerce Platform

Full-featured e-commerce app with user auth, cart, payment (PayPal/Stripe), and admin dashboard for product and order management.

Edu.Care – Digital College Portal

Responsive college site with student data management and live announcements. Built using PHP, MySQL, and modern frontend tech.

GradeText AI – Smart Bangla Document Editor

AI-based Bangla document editor with word suggestions, Unicode/Bijoy support, and image command recognition.

Education

Diploma in Engineering

Mymensingh Polytechnic Institute

S.S.C

Protiva School and College
